Resene

whites & neutrals

Resene
Total Colour
System

whites & neutrals

A collection of colours ranging from brightest whites to rich creams and strong beiges, ideal on their own or as a contrast to stronger colours.

Inspired by the New Zealand landscape, the subtleties of the natural environment are captured in this range.

Whites & neutrals are the perfect backdrop to any setting, both interior and exterior, contemporary and traditional.

Caring for your paint finish

Annual washing of your exterior paintwork and careful cleaning of your interior paintwork will keep your paint finish looking good for longer. Follow the recommendations in the Resene Caring for your Paint Finish brochure or on the Resene website to keep your paintwork looking its best.

Explore a colour library

View an extensive range of Resene colour swatches in the online Resene colour library, then download the ones you like. Once you have found your favourites, order testpots online and try them out for yourself in the real world. Or browse through the in-store libraries of colour that can be found at most Resene ColorShops. With over 1000 variously coloured A4 swatches to pore over, you're bound to find one that suits.

'See' the finish

Virtual painting with Resene EzyPaint allows you to visualise the entire colour scheme before the redecorating even starts. Resene EzyPaint can be downloaded free from the Resene website www.resene.co.nz (NZ), www.resene.com.au (AUST) or purchased on CD Rom from your local Resene ColorShop or Reseller.

Put your colour to the test

No matter how you select your colours, always use testpots to confirm your choices in the area you are planning to paint. Resene testpots are available from your local Resene ColorShop or Reseller or you can order online from the Resene website.

Choose to help the environment

You can minimise the effect your next decorating project has on the environment by choosing one of the Resene range of Environmental Choice approved products.

Colour	Tone	Total Colour Reference	Approx RV %
Akaroa	W	6B024	55
Alabaster	W	8.5GR12	92

Tussock	M	3Y031	41
Vista White	W	8B040	84
White Rock	W	7Y009	71

NOTE KEY:
L = Light **M** = Mid **O** = Ochre
P = Pastel **W** = White

Note 1: The approximate reflectance value (RV) of a colour indicates the amount of light and heat that a colour will reflect. Black has a reflectance value of 0% and absorbs all light and heat. The surfaces are consequently very dark and can get very hot. In contrast, white has a reflectance value of 100% and keeps a building light and cool. All colours fit within these two extremes.

Note 2: Tones listed above are subject to change if colours are reformulated.
